

Microprocessors Bonus Simulation Project

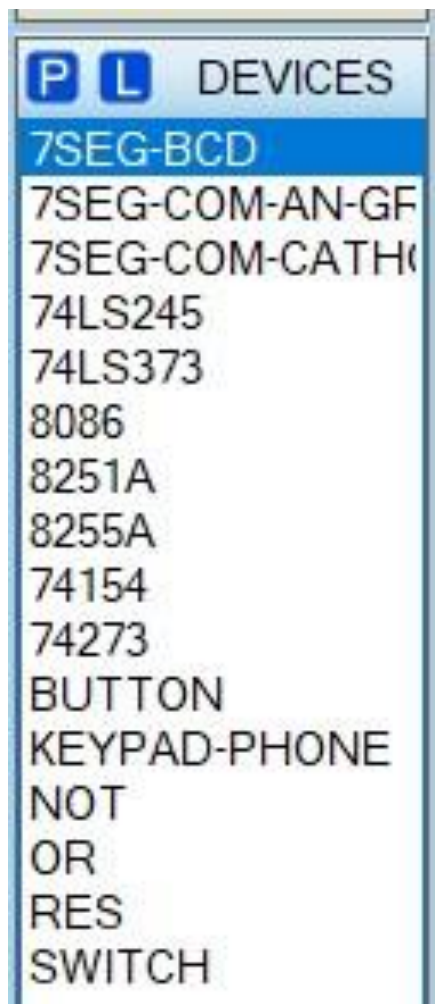

Hakkı Egemen Gülpınar

17-155-014

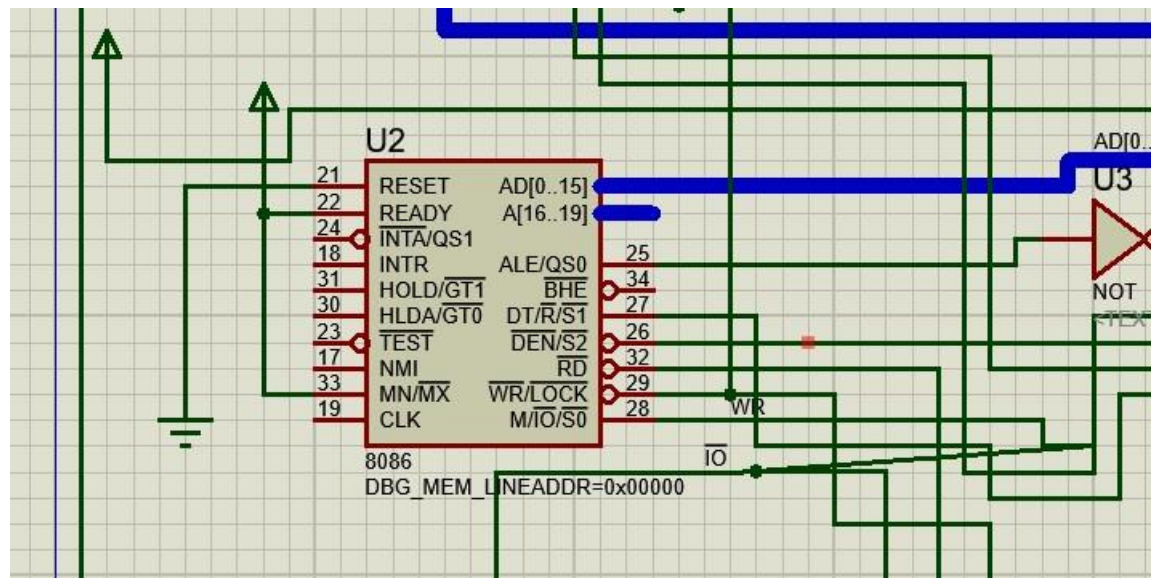

Computer Engineering 3rd Grade

In this project, a simulation is designed that projects the keys pressed on the screen. I used the following devices →

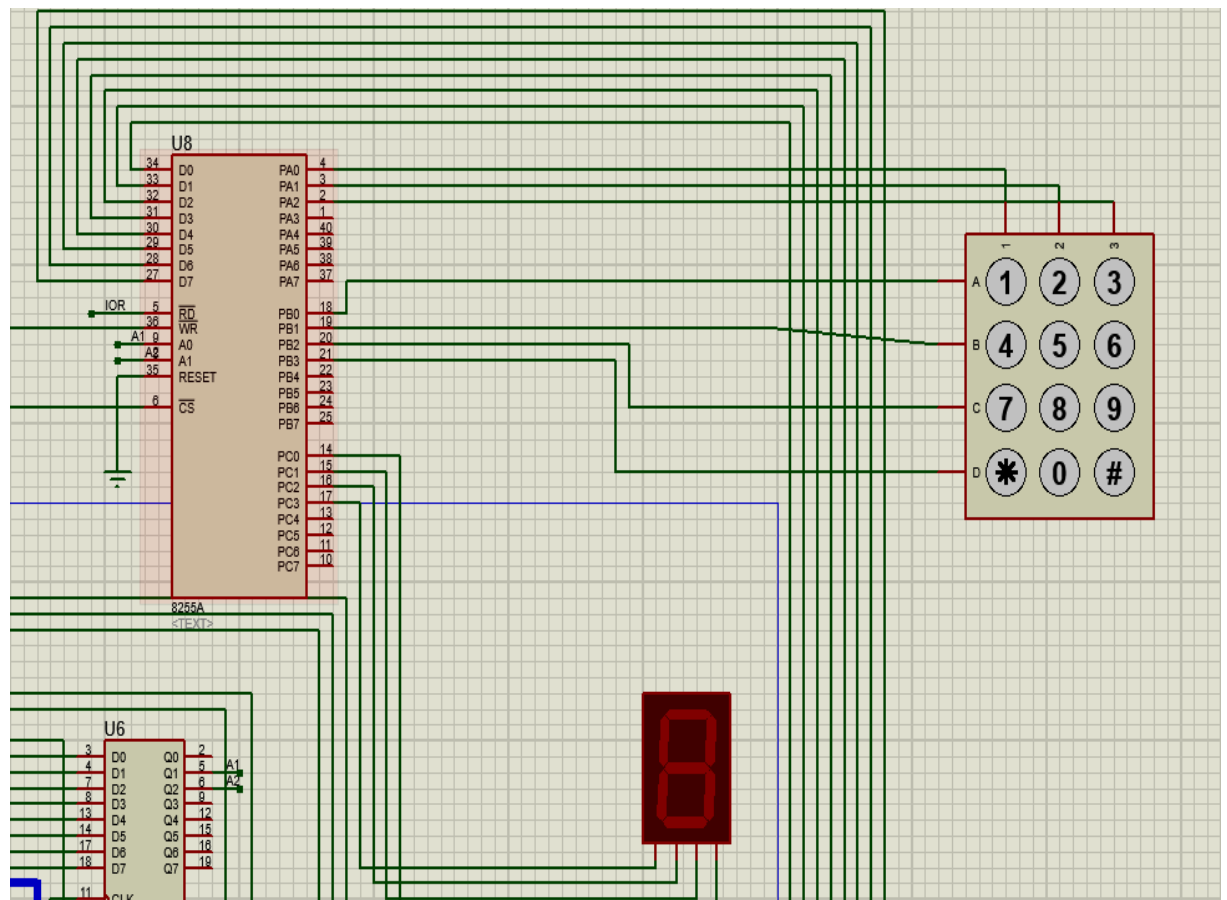

- 1- 8086 microprocessor
 - 2- 8255A for i/o
 - 3- 3X4 KEYPAD
 - 4- 2 74273 LATCHES for address
 - 5- 2(8K) ROM
 - 6- 2(8K) RAM
 - 7- 74LS245 DATA BUFFER for data transiving
 - 8- 2 INVERTOR
 - 9- 4 OR GATES
 - 10- CLOCK GENERATOR CIRCUIT
- the connection will presented in parts

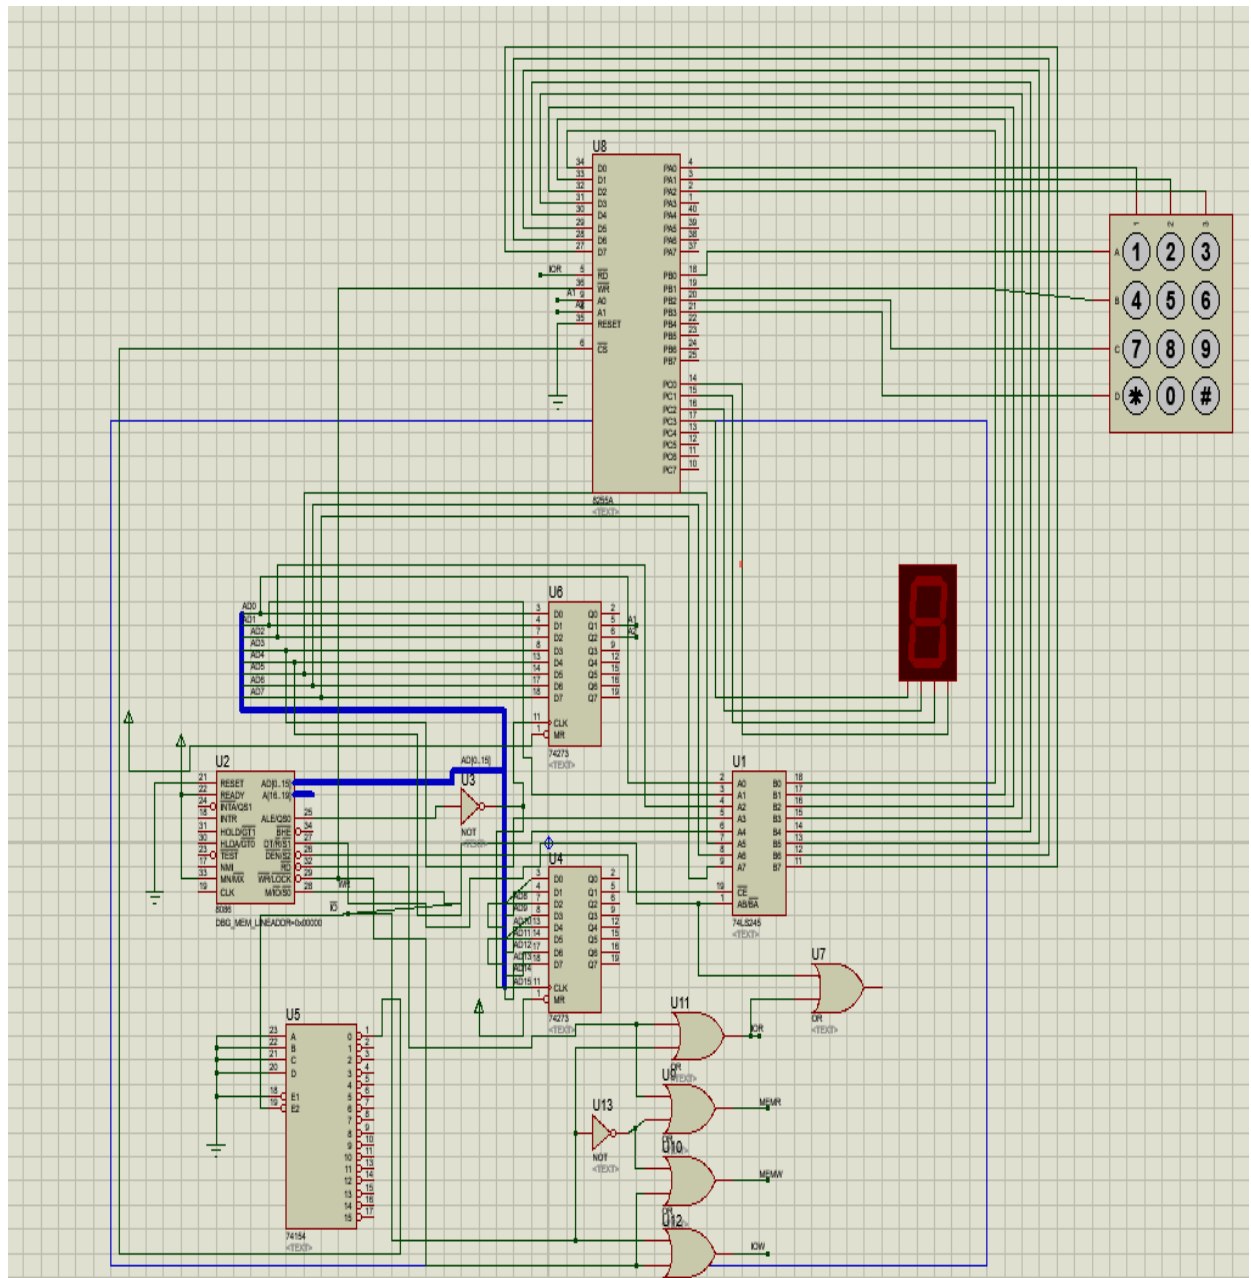

8086 circuit in the simulation

7SEG BCD,KEYPAD PHONE and 8255A circuitis in the simulation

This is the link for short video showing the project in work.
